Princess Kidnapper is a first person, wave-based defense archery title. In this game, you have kidnapped a princess, and held her captive in a tower. As her calvary comes to her rescue, your task is to take them down by firing arrow before they can get to the tower.

These army doesn't attack you, their only objective is to rescue the princess. This means you will only be focusing on attacking them as they charge their way. There's no locomotion, as you are stationary on a tower. You will be equipped with a bow and arrow as you take down a variety of these soldiers, each with their speed, health point and weakness. There are also power-ups which you can obtain by shooting down the birds who carry them. These power-ups enhanced your arrow, some requiring you to hit the enemy to work, such as explosive or iced.

The game is presented in a casual, colorful aesthetic, and this seems to be an endless game, meaning it will keep on going until you lose. The game is rather straightforward and easy to get into, so it may be suited more for kids rather than adult. this thrown-away title serves well as a time-killer for kids to play, but I do recommend only picking this up if it has 75% discount or more.. Here is my first time gameplay video: <https://youtu.be/VP3tCBbFyyIA>

[I also review other games on my channel: www.youtube.com/c/thefishstick](http://www.youtube.com/c/thefishstick)

[The arrow upgrades are neat: my favorite is the dynamite one. The game runs smooth and has never crashed on me.](#)

[Honestly right when I started the game I though it was pretty nifty. After making it to 10+ waves a couple of times and having to start all the way over every time I became tired of it pretty quick. There are 30 waves total; i wish there was something that let you retry a couple of times before having to completely start over.](#)

[Also. In the video at the end I recommend the game: honestly after thinking about it I would recommend this game if it was more a long the lines of \\$2.99 but not at it's current price. Sorry =\ Great game for the kiddos none the less.](#)

[. I apologize if I offend the developer, but I cannot recommend this game to anyone. I bought this when it was on sale \(I believe an 80% discount\) and upon playing it, it was a greater waste of time than it was worth. It looked fun from the videos, and I thought "the game is only about a \\$1, so why not?" Turns out, it was more frustrating and annoying than it seemed. Recommendations to make this a better game: make the sounds less annoying, add basic game mechanics \(settings menu, leaderboard, etc.\), give it some sort of in-game story \(even if it's just text, cause right now the name "Princess Kidnapper" doesn't really make sense to me\). Some big improvements to this game are necessary and I would change my score to positive.](#)
