11, you can now build the ultimate vehicle: a multi-functional transportation appliance. Description Trailmakers .11 is a streamlined, user-friendly version of Trailmakers .10. We've added key features to the game, such as the ability to create your own customization options for your vehicles, and the ability to build vehicles that are actually capable of carrying passengers. Once you're finished making your custom vehicle, you can send it off to the race. Once at the race, you can make the most of the customizable parts on your vehicle, and see if your multi-modal design won over the other entrants. Racers, start your engines! Now, it's time to tear up the road. We've added several new parts to the game, including our first vehicle chassis, a Freightliner W5 chassis (or "Sled" for short), a luxury-themed Freightliner SX chassis, a utility vehicle chassis, and a Boeing-themed Boeing 767 chassis. We've also added several car/plane/boat/... chassis. These chassis can be used to make car/plane/boat/... on them. They also come with their own parts, such as the luxury SUV center console and a pair of hydraulic rams. These new parts are available to all new players as they join the game for the first time. As a bonus, we've added the 4X4 Parts Parts Parts tree for all players to keep an eye out for, in case you're looking for some new parts to build your next ride. Finally, we've fixed several bugs and added a few features, such as the ability to save custom parts to your game, the ability to print parts to the user interface, and an update of our banking systems. Important note: If you've previously downloaded a version of Trailmakers .11 that's less than .11, you'll need to download .11 for it to work. Trailmakers, we have big plans for you! Here at my CAR, we've been thinking about Trailmakers for a while now. But until now, we haven't been able to give it to you. What we have been doing is planning, and building, and thinking about all of the features that we'd like to see in Trail
